

Sebata Remote Working Stations & Support

The COVID-19 coronavirus pandemic is forcing many employers to send workers home. Apple, Facebook, Microsoft and even Fortune are closing offices out of an abundance of caution to prevent the spread of the virus and protect their employees.

That's creating a new swath of telecommuters, many of whom have never worked from home for an extensive period.

Sebata provides a unique and innovative approach with unique solution to remote application deployment and centralised support. Access work with the Microsoft Office Suite and other applications with minimal data usage accomplished by user device receiving screen updated. Increasing security and productivity.

**Cost saving,
uptime &
improved work
performance and
built in security.**

Cost Saving

Data usage can decrease drastically to less than average corporate usage, saving time and money.

Uptime & Improved Work Performance

Easy and fast employee access to tools and systems, 20% more work productivity. Access and uptime increase business speed and productivity.

Built-in security

Data and company information is kept safe due to restricted saving capability, decrease in security breaches and alerts. Secure environment equals business agility. The provided solution can be incorporated into the municipality's policies.

Solution Requirements

Workstation with Windows 10 (preferably) or Windows 8.1.

MS TEAMS will be installed remotely.

Internet connection and or Remote Internet Connection like LTE / 3G.

User list with name and surname as well as contact numbers to be able to contact users for remote access.

In case the Municipality has Active Directory implemented, access to server for Azure AD Sync to obtain users.

Alternatively, List of users and details to setup and configure Cloud user accounts.
